

KETIKA AKU MASIH KECIL

WHEN I WAS LITTLE

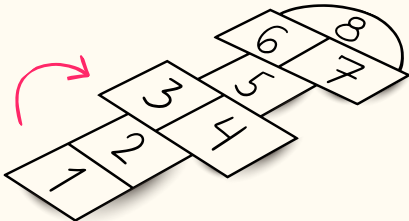

ENGKLEK

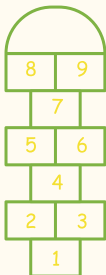

Pada awalnya, permainan ini berasal dari Belanda loh dan disebut 'Zondag Maandag', kemudian orang Jawa menyebutnya 'Engklek' yang artinya lompat dengan satu kaki.

At first, this game came from the Netherlands and was called "Zondag Maandag." Later, people in Java named it "Engklek," which means hopping on one foot.

Engklek dimainkan dengan cara membuat 8 kotak yang disusun berbentuk persegi panjang, kemudian ditambah setengah lingkaran di atasnya.

To play Engklek, you draw eight boxes on the ground in a long rectangle shape. Then, you add a half circle at the top.

Gaco digunakan sebagai penanda kotak yang menjadi "milik" pemain, sehingga lawan tidak diperbolehkan menginjak atau jatuh pada kotak tersebut.

The gaco is used to mark a player's "owned" square, and other players are not allowed to step or land on that square.

GACO: alat lempar berupa potongan genteng atau batu pipih

GACO: a throwing piece made from a small roof tile shard or a flat stone.

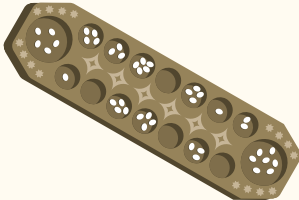

CONGKLAK

Sumatera

Istilah "conglak" lebih dikenal di Pulau Sumatera, sedangkan di Pulau Jawa permainan ini sering disebut "dhakon."

The term "conglak" is more commonly used in Sumatra, while in Java, this game is often called "dhakon."

Congklak dimainkan menggunakan papan yang memiliki 14 lubang kecil dan 2 lubang besar yang disebut lumbung. Permainan ini dimainkan oleh dua orang.

Congklak is played using a board with 14 small holes and 2 bigger holes called lumbung. The game is played by two players.

Alat bermainnya adalah biji-bijian, bisa berupa kerang kecil, batu kerikil, atau biji congklak

The game pieces are small seeds, which can be tiny shells, small pebbles, or special congklak seeds.

Masing-masing pemain berusaha mengumpulkan biji sebanyak mungkin ke dalam lumbungnya dengan menyusun strategi saat bermain.

Each player tries to collect as many seeds as possible in their own lumbung by planning their moves carefully.

GOBAK SODOR

Gobak sodor pada awalnya dimainkan oleh para prajurit Indonesia untuk berlatih perang. Namun ternyata permainan ini tidak berasal dari Indonesia loh, kata gobak sodor diambil dari kata "go back to the door" yang artinya menembus pintu.

At first, gobak sodor was played by Indonesian soldiers as a way to practice for battle. But surprisingly, the game did not actually come from Indonesia. The name "gobak sodor" is believed to come from the phrase "go back to the door," which means to pass through the door.

TIM DIBAGI MENJADI 2

The players are divided into two teams

TIM PENJAGA

team guards

TIM PENEROBOS

The passing team

Tim penjaga harus menyentuh lawan agar mereka gagal.

Tim lawan harus berlari melewati garis sampai akhir tanpa tersentuh.

The guarding team must tag the opponents to stop them.

The other team must run across the lines to the end without being touched

Kalau berhasil pergi dan kembali dengan aman, tim lawan menang.

Kalau tersentuh, mereka kalah dan bergantian posisi.

If they can go to the finish line and return safely, they win.

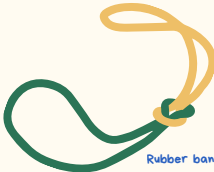

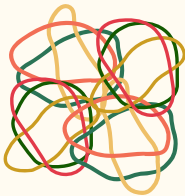

If they get tagged, they lose and the teams switch roles.

LOMPAT KARET

Permainan ini hampir mirip dengan lompat tali. Namun, yang membuatnya unik adalah lompat karet dibuat menggunakan karet gelang yang dianyam sepanjang 3-4 meter.

This game is quite similar to jump rope. However, what makes it unique is that the rope is made from rubber bands that are woven together into a long stretch, about 3-4 meters long.

Karet gelang dianyam menjadi tali panjang.

Rubber bands are woven into a long rope.

Cara bermainnya juga berbeda dari lompat tali biasa. Dalam lompat karet, pemain harus melompati tali yang direntangkan sebagai rintangan. Permainan ini dapat dimainkan oleh minimal tiga orang.

The way it is played is also different from regular jump rope. In this game, players have to jump over a stretched rubber rope as an obstacle. It can be played by at least three people.

Pemain harus melompati tali karet tanpa menyentuhnya sama sekali. Jika berhasil, tinggi tali akan dinaikkan secara bertahap, mulai dari permukaan tanah hingga semakin tinggi.

Players must jump over the rubber rope without touching it. If they succeed, the rope is raised higher step by step, starting from the ground and going up little by little.

EGRANG

Egrang adalah permainan tradisional Indonesia yang menggunakan dua batang bambu sebagai alat untuk berjalan di atas tanah. Pemain harus menjaga keseimbangan sambil melangkah tinggi, seolah menantang gravitasi.

Egrang is a traditional Indonesian game where players walk using two tall bamboo poles. They have to balance carefully while stepping high, as if they are trying to beat gravity.

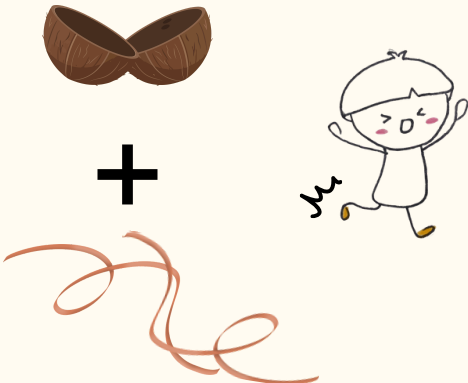

Egrang sudah terkenal sejak Zaman Belanda sebagai salah satu permainan tradisional Indonesia dan tercatat dalam buku Javanese Kinder Spellen

Egrang has been known since the Dutch era as a traditional Indonesian game and was mentioned in a book called Javanese Kinder Spellen.

Selain egrang bambu yang sering dijumpai di Jawa, beberapa daerah juga mengenal egrang batok kelapa. Meskipun bahan dan bentuknya ada variasi, inti permainannya serupa, yaitu menjaga keseimbangan di atas alat penyangga.

Besides the bamboo stilts commonly found in Java, some regions also have coconut shell stilts. Even though the materials and shapes may vary, the main idea of the game is the same, which is to keep your balance while standing and walking on the supports.

Temani Ash menjelajahi masa kecilnya melalui berbagai permainan tradisional Indonesia. Dari engklek hingga layang-layang, setiap permainan menyimpan cerita, tawa, dan nilai kebersamaan yang menjadi bagian dari budaya kita.

Come along with Ash as he revisits his childhood through traditional Indonesian games. From engklek to flying kites, each game is filled with stories, laughter, and the spirit of togetherness that shapes our culture.
